**Note:**

(1) Equity requirements are determined based on the total investment capital (including the total preliminary cost of project implementation and compensation, support, and resettlement costs (if any)).

The investor's equity is determined based on:

- Financial reporting results or reporting results for audited equity items performed during the year; in case there are no financial reporting results or reporting results for audited equity items performed during the year, the financial reporting results or reporting results for audited equity items of the previous year shall be used in accordance with the provisions of the law on enterprises, the law on auditing, and the law on accounting;

- For enterprises established and operating for less than 12 months, equity is determined according to the contributed charter capital in accordance with the provisions of the law on enterprises. In case at the same time the investor participates in investing in many projects and long-term financial investments (if any), the investor shall declare the list of projects being invested in and other long-term financial investments (if any), ensuring that the entire amount of equity capital that the investor commits to implement for all projects and other long-term financial investments as prescribed.

The investor must declare information and provide documents on financial capacity according to Form No. 05, Chapter III – EOI Forms.

(2) Experience in implementing similar projects:

- (i) Projects, bid packages, and contracts must ensure that investors meet technical and quality requirements according to signed contracts (for projects and bid packages requiring contract signing) or documents approving the results of acceptance of completed works, project work items, or equivalent documents of competent authorities according to regulations of law on construction corresponding to each period to be considered and evaluated.

- (ii) Investors and partners are only allowed to cite once the experience of implementing a similar project and similar bidding package and contract.

- (iii) For projects that do not have a similar project in terms of total investment capital, based on data on the National Bidding Network System on selected projects, investors and interested parties shall report to the competent authority for consideration and stipulate in the invitation for interest documents

that the experience of implementing a similar project is equal to or not lower than 90% of the level required in the invitation for interest documents of the energy project investment project with the closest total investment capital to the project under consideration.

(iv) For projects requiring the application of advanced technology, high technology, environmentally friendly technology, and the best available techniques to minimize environmental pollution, investors are allowed to use projects and works in which they contribute capital and directly implement the technology that has been successfully put into trial operation to demonstrate experience in similar projects and works. Similar projects must have documents proving that the technology and techniques are recognized according to the provisions of the law on electricity and other relevant laws.

(v) For projects in points (iii) and (iv) of this note, during the review and evaluation process, it must be ensured that investors have full financial capacity and technical capacity to implement the project. The project implementation requirements in the bidding documents, contracts or decisions approving investors must ensure that the investor's responsibilities and handling measures (penalties, compensation for damages, handling in the next phase) are fully specified in the event that the investor implementing the project does not meet the requirements on progress and quality. The competent person is authorized to stipulate the contract performance guarantee value as 3% of the total value of the project in the case of organizing a bid to select investors or the appropriate level of investment project implementation guarantee in accordance with the provisions of the law on investment in the case of applying investor approval procedures.

(vi) For type 2 and type 3 projects, in the case the investor or partner participates as a partnership contractor, only the value of the work directly performed in the partnership is used to prove the similar bidding package or contract.

(3) The investor contributing equity capital to the project is the investor who has contributed equity capital to the project (in case the investor does not establish an economic organization to implement the project), or is a founding shareholder (in case the investor establishes an economic organization to implement the project), or is the investor receiving the transfer of shares or capital contributions from the founding shareholder before the project is put into operation.

(4) Method of converting projects:

- 01 project/bid package/contract of type 2 is equal to 0.2 projects of type 1.
- 01 project/bid package/contract of type 3 is equal to 0.1 projects of type 1.

In the case the total number of converted projects is a decimal number, the number will be rounded if the decimal number is greater than or equal to 5.

(5) Completion: A completed project is a project in which all construction items have been accepted and are eligible for exploitation and use in accordance with the provisions of the law on construction.

(6) For projects that have not clearly defined the total investment value in the approval documents and project contracts, investors must provide supporting documents to determine this value.

(7) In the case where the investor has carried out works and construction items similar to the main works and main construction items of the project under consideration, the investor can add up the total value of these works and construction items to demonstrate its similar experience.
